RUBBER

Sustainable entrepreneurship with Hecmar

Hecmar realises that the well-being of our planet deserves our full attention. Future generations must also be able to live in a healthy environment. For this reason, we manufacture our products from rubber granulate recycled from, for example, car tyres. Operating in this way enables us to save scarce raw materials, and minimise energy consumption and the emission of harmful substances.

Aslon EPDM and Multiplay tiles have been tested according to the REACH regulation, which means that the product contains such a low amount of harmful substances that it is not harmful to humans or environment.

For Hecmar, sustainability is more than just a vague concept; it is a key factor in everything we do. Hecmar is committed to establishing a circular economy with the goal of reusing all raw materials in order to minimise value destruction.

Safe & Soft SBR Tile

With their fall-breaking properties, SBR tiles provide the best possible combination of safe play and fun. The tiles are easy to lay and maintenance-friendly. The drainage structure under the tiles ensures that rainwater drains away quickly allowing the top layer to dry in no time at all. Aslon rubber tiles are produced from recycled rubber granulate. They also remain 100% recyclable after use.

SBR tiles are suitable for sport and play and have been tested for various fall height Head Injury Criterion (HIC) values. Aslon SBR tiles comply with the strictest standards for impact protection set by EN1177:2018 and EN 1176-1:2017.

Dowel joints:

Dowel joints are available on Aslon Safe & Soft tiles. On two edges of each tile there are four holes. Four plastic pins are inserted into these holes allowing the tiles to be joined together.

Specifications:

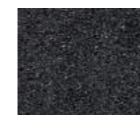

Colours:

black

red

green

grey

Sizes:

500 x 250 mm, 500 x 500 mm, 1.000 x 1.000 mm

Thicknesses:

25 mm, 30 mm, 40 mm, 45 mm, 55 mm, 75 mm and 100 mm
(100 mm not available for the 1.000 x 1.000 mm tiles)

Extra:

these tiles are also available with a bevelled corner or edge.

Fall heights:

Head Injury Criterion (HIC)

25 mm	0,80 mtr
30 mm	1,00 mtr
40 mm	1,45 mtr
45 mm	1,50 mtr
55 mm	1,70 mtr
75 mm	2,40 mtr
100 mm	3,00 mtr

Benefits:

- ✓ Fall protection
- ✓ Low maintenance
- ✓ Porous
- ✓ Studded structure on lower side for better drainage
- ✓ Easy to fit
- ✓ Sound absorbing
- ✓ 100% recyclable

Safe & Soft Multiplay Tile

Multiplay tiles have an artificial grass surface that makes them ideal for playing on. The tiles are available in six different colours that are easy to combine to create a fun surface that will appeal to children. Replacing tiles that are broken after, for example, vandalism is also much easier than laying a new roll of artificial grass.

Multiplay tiles are suitable for sport and play and have been tested for various fall height Head Injury Criterion (HIC) values. Aslon Multiplay tiles comply with the strictest standards for impact protection set by EN1177:2018 and EN 1176-1:2017.

Dowel joints:

Dowel joints are available on Aslon Safe & Soft tiles. On two edges of each tile there are four holes. Four plastic pins are inserted into these holes allowing the tiles to be joined together.

Benefits:

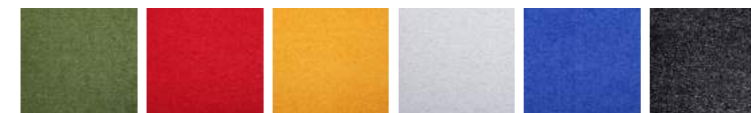

- ✓ Fall protection
- ✓ Lightweight
- ✓ Easy to combine colours
- ✓ Low waste
- ✓ Porous
- ✓ Easy to fit
- ✓ Simple to replace if damage or vandalised
- ✓ 100% recyclable

Specifications:

Colours:

green red yellow white blue black

Sizes: 500 x 250 mm, 500 x 500 mm, 1.000 x 1.000 mm

Thicknesses: 25 mm, 30 mm, 45 mm, 65 mm and 100 mm

(+10 mm to 15 mm artificial grass height)

(100 mm not available for the 1.000 x 1.000 mm tiles)

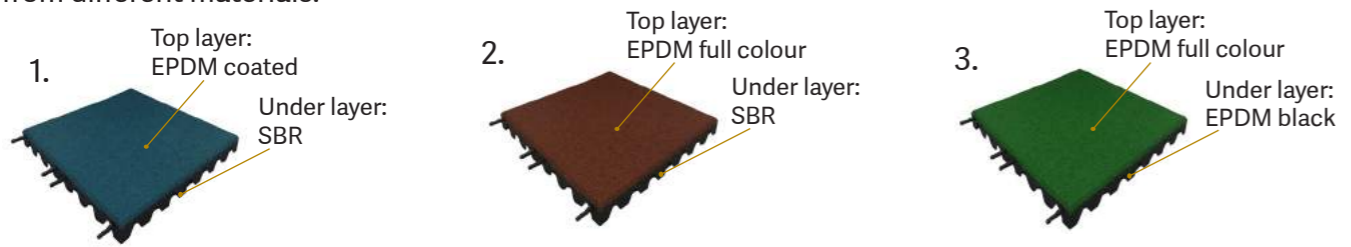

Fall heights: Head Injury Criterion (HIC)

25 mm	0,80 mtr
30 mm	1,10 mtr
45 mm	1,50 mtr
65 mm	2,05 mtr
100 mm	3,00 mtr

Safe & Soft EPDM Tile

EPDM tiles have a top layer made from EPDM rubber. EPDM rubber is a new, colourfast synthetic rubber. Three types of tiles with an EPDM top layer are available; each with their own specific structure and made from different materials.

EPDM tiles are suitable for sport and play and have been tested for various fall height Head Injury Criterion (HIC) values. Aslon EPDM tiles comply with the strictest standards for impact protection set by EN1177:2018 and EN 1176-1:2017.

Specifications:

- Colours: Various RAL-colours and a variety of mixed colours
- Sizes: 500 x 250 mm, 500 x 500 mm, 1.000 x 1.000 mm
- Thicknesses: 25 mm, 30 mm, 40 mm, 45 mm, 65 mm, 80 mm and 100 mm
(100 mm not available for the 1.000 x 1.000 mm tiles)

Benefits:

- ✓ Fall protection
- ✓ Lightweight
- ✓ Colourfast top layer
- ✓ Easy to combine colours
- ✓ Sound absorbing
- ✓ Studded structure on lower side for better drainage
- ✓ UV-resistant
- ✓ Wear resistant
- ✓ Easy to fit
- ✓ 100% recyclable

Fall heights:

Head Injury Criterion (HIC)

25 mm	0,80 mtr
30 mm	1,05 mtr
40 mm	1,40 mtr
45 mm	1,55 mtr
65 mm	2,15 mtr
80 mm	2,25 mtr
100 mm	3,00 mtr

Dowel joints:

Dowel joints are available on Aslon Safe & Soft tiles. On two edges of each tile there are four holes. Four plastic pins are inserted into these holes allowing the tiles to be joined together.

Playground accessories

Playgrounds. All children want to spend as much time in them as they can; running about, romping and climbing without a care. Great fun! However... they need to be able to do so safely of course. This is why Aslon Rubber has designed rubber surfacing specially for playgrounds. Safe for the kids. Reassuring for the parents.

Benefits:

- ✓ Fall protection
- ✓ Lightweight
- ✓ Soft and safe
- ✓ Available in 3 colors
- ✓ Easy to fit
- ✓ 100% recyclable

Rubber cube

Size: 300 x 300 x 300 mm

Rubber sleepers

Size: 1.000 x 300 x 150 mm

Rubber containment kerb

Size: 1.000 x 250 x 50 mm

Rubber palisade edging

Size: 250 x 400 mm
250 x 600 mm

Rubber sand pit kerb

Size: 1.000 x 300 x 150 mm

Bevelled rubber kerb cover

Size: 1.000 x 400 x 150 mm

Rubber grass tile

Size: 1.000 x 500 mm

Thickness: 45 mm and 65 mm

Bevelled rubber tile

Size: 500 x 500 mm
1.000 x 1.000 mm

Thickness: 30 - 100 mm

Hopscotch tile

Size: 500 x 500 mm

Thickness: 30 - 100 mm
